

Amendments to the Specification

Page 29, line 24, through page 30, line 5, amend and replace the paragraph as shown below.

-- On the second frame member 304, a pair of second attachment flange sections 316a, 316b protrude from ~~the~~ flange sections ~~234~~ of the ~~first~~ second frame member ~~302~~ 304 and are disposed at upper and lower portions of the second frame member 304. A pair of upper and lower second elongate engaging holes 318a, 318b are formed through the second attachment flange sections 316a, 316b (see FIG. 17), and are substantially perpendicular to the axis of the second frame member 304. --
